

PROJECT 10073 RECORD

1. DATE - TIME GROUP 21 July 65 22/0130Z	2. LOCATION Monticello, New York
3. SOURCE Civilian	10. CONCLUSION A/C
4. NUMBER OF OBJECTS Two	No data presented to indicate that the objects could NOT have been A/C. Four jet air routes intersect 20 mi South of observer location.
5. LENGTH OF OBSERVATION 2 Minutes & 5 Minutes	11. BRIEF SUMMARY AND ANALYSIS
6. TYPE OF OBSERVATION Ground-Visual (TX)	Report submitted in August over one month after sighting. Consisted of triangular shaped object white with red nose and a bright light aft. Described as fastest thing in the sky. 1st object was 40-50 deg elevation, 2d object 5-10 deg elevation. First faded near vertical, 2d disappeared over the horizon. Fast speed reported is inconsistent with a duration of 2 minutes.
7. COURSE Manuvered	
8. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
9. PHYSICAL EVIDENCE <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Stewart Air Force Base, N.Y 12554

TO: Air Force Systems Command (FTD)
Wright-Patterson AFB

SUBJECT: UFO Sighting

A. Description of the object:

1. The UFO was triangular in shape.
2. The UFO was the size of a pea to the eye, the size of a nickel in a 6 power telescope.
3. The object was white to the eye. The object had a red nose, and a white body with a bright light aft in the scope.
4. There was one UFO.
5. N/A
6. Lines on front and port of nose.
7. A bright light, like a "sparkler aft".
8. None.
9. None.

B. Description of Course of Object.

1. Observers attention was drawn to object because of its fast movement "fastest thing in the sky".
2. The UFO was at an angle of 40° to 50° above the horizon when sighted first. It reappeared at the angle of $5-10^{\circ}$ above horizon.
3. The UFO faded out near vertical and passed over the horizon on second sighting.
4. Zigzag, or like lights flashing on aircrafts wings tips. The UFO went from North to South, then passed from East to West near Southern horizon. It moved faster than a satellite and unlike a meteorite. It moved too fast to be observed in any but the finder scope of observers astronomical telescope.
5. Faded near vertical and passed over horizon second sighting.
6. The UFO was first visible less than two minutes, then reappeared about 20 minutes later for about five minutes.

C. Manner of Observation.

1. Ground visual.

2. A finder scope of six power was used. It was on a 600 power astronomical telescope mounted on a standard astronomical tripod.

3. N/A

D. Time and Date of Sighting.

1. Sighted at 0130Z and 0200Z, 22 July 1965.

2. It was sighted at night.

E. Location of Observer.

1. About 2 miles South of Monticello, New York in a large open space, 41° 38' N 72° 41' W.

F. Identifying Information on Observer.

1. Civilian

A. 1. Mr. [REDACTED]

2. 13 years of age

3. [REDACTED]
Monticello, New York

4. Student and Amateur Astronomer.

5. Reliability - Above average for age.

2. Military N/A

G. Weather and winds aloft conditions at time and place of sighting.

1. Observer states that weather was good, air was clear.

2. AWS winds, Stewart AFB, NY

A. Surface L/V

B. 6000 300/10

C. 10000 320/15

D. 16000 310/50

E. 20000 310/35

F. 30000 350/65

G. 50000 330/50

H. 80000 N/A

3. Ceiling - None
4. Visability - 40 Miles
5. Cloud Cover - less than 1/10
6. Thunderstorms - None
7. Temp - Gradient

6000 +6⁰

10000 +3⁰

16000 -7¹/₂⁰

20000 -17⁰

30000 -39¹/₂⁰

50000 -56¹/₂⁰

H. Unusual Activity

1. None

I. N/A

J. Balloons were released at Albany and at Kennedy Airports at 0000Z. Air traffic was light.

K. Preparing Officer.

1. 1st Lt Roger B. Tyrrell, Electronic Warfare Officer, 6713 DSES, Stewart Air Force Base, New York.

2. Preliminary Analysis - I feel that Mr. [REDACTED] perhaps observed a weather balloon. This area is quite near J-63 and other main jet routes to New York City. Huguenot Vortac is about 20NM South of there and is the intersection jet routes J-63, J-7, and J-95.
